

## PBI has over 1100 supermarkets on our Saw and Grinder Plate Preventive Maintenance Service!

### Chopper Plates & Knives An Innovative Idea

The "Double Life Program" consists of three perfectly matched cutting tools, one reversible chopper plate and two bar chopper knives. Each knife is designed to cut meat for several months and be thrown away when dull. The chopper plate is then reversed and the new knife positioned with it. You are then ready for several more months of unequaled cutting.

- Order components separately (2 knives, 1 plate)
- Please state make of grinder and size of plate
